Phone: +254 726 916 068

Address: P.O Box 9667-00200

Location: Nairobi, Kenya

PROFESSIONAL SUMMARY

Proficient and innovative Full Stack Developer with proven expertise in MERN Stack (MongoDB, Express, React, Node.js). Skilled at developing scalable web applications, integrating secure APIs, and delivering exceptional UI/UX with modern frontend frameworks like React and Tailwind CSS. Demonstrated ability through projects such as JAYS CLOSET, with strong skills in problem-solving, deployment, and database management.

EDUCATION

High School

Studied at Murang'a High School.

Bachelor of Science in Software Development

KCA University – Graduated on July 4th 2025.

CERTIFICATIONS & TRAINING

- React Developer Path – GomyCode & Scrimba (Ongoing)
- MERN Stack Developer Certification — Self-study, Real-world projects (2024–2025)
- GitHub Deployment & Hosting – Real-world projects

WORK EXPERIENCE

Freelance MERN Stack Developer (JAYS CLOSET Project)

Nairobi, Kenya | 2024 – Present

Built and deployed JAYS CLOSET, a scalable MERN stack e-commerce application.

Developed frontend with React and Tailwind CSS, ensuring mobile responsiveness and intuitive user experience.

Engineered backend REST APIs using Node.js and Express.js, implemented secure authentication using JWT, and managed data using MongoDB.

Collaborated closely with stakeholders to ensure features aligned with client needs, optimized performance, and maintained clean, modular, well-documented code.

Managed deployment lifecycle with GitHub for version control and Render/Netlify for hosting.

Custom Web Applications and Projects

Created specialized applications including Recipe-App, Travel-Journal, and Meme-Generator, demonstrating strong frontend logic, component reusability, and dynamic content rendering.

Collaborated closely with clients to define project goals, feature specifications, and timelines; consistently delivered ahead of deadlines.

Maintained excellent client communication, ensuring project objectives were clearly understood and successfully implemented.

CORE SKILLS AND COMPETENCIES

- ✓ **Frontend Development:** React.js, JavaScript (ES6+), Tailwind CSS, HTML5, CSS3, Redux Toolkit
- ✓ **Backend Development:** Node.js, Express.js, RESTful API development.
- ✓ **Databases:** MongoDB, MySQL, Database Schema Design, Query Optimization.
- ✓ **Version Control & Deployment:** Experienced with Git and GitHub for source control; deployed applications on Netlify, Render, and Railway with environment variable configurations.
- ✓ **Full Stack Tools:** JWT Authentication, API Integration, Protected Routes
- ✓ **Problem Solving:** Strong analytical thinker with hands-on debugging skills using browser dev tools, console logs, and structured testing.

- ✓ **Team Collaboration:** Experienced in working on modular codebases, understanding project structure, and contributing to group projects with clean code practices.
- ✓ **Rapid Learning & Adaptability:** Eager to learn new technologies quickly and integrate them into projects — demonstrated by self-paced mastery of React, MySQL, and backend deployment workflows.
- ✓ **Communication:** Clear and professional in both technical and non-technical communication, with experience documenting APIs and explaining technical decisions.
- ✓ **Others:** Responsive Web Design, UI/UX Principles, Debugging & Testing

PROJECTS

• JAYS CLOSET E-Commerce Web App

(MERN Stack: MongoDB, Express, React, Node.js, Tailwind CSS)

Developed a full-stack e-commerce web application featuring product listings, detailed product pages, shopping cart, and seamless checkout process.

Implemented secure user authentication and authorization using JWT.

Created a robust backend API with Express.js, integrating MongoDB for efficient database management.

Designed a fully responsive, user-friendly frontend with React.js and Tailwind CSS, emphasizing excellent UX/UI principles.

Managed codebase using Git and GitHub; deployed frontend on Netlify and backend API on Render.

GitHub: <https://github.com/DenisKiarie3/JAYSCLOSET-FRONTEND.git>

Netlify: <https://jayscloset.netlify.app/>

• RECIPE-APP

A React-based recipe management application.

- Allows users to browse, search, and view detailed recipes
- Showcases React Router DOM for navigation and useState/useEffect hooks for data fetching
- Clean user interface and responsive layout ideal for culinary enthusiasts

GitHub: <https://github.com/DenisKiarie3/RECIPE-APP>

Netlify: <https://deniskiarierecipeapp.netlify.app/>

• TRAVEL-JOURNAL

A digital travel log built with React.

- Users can document their journeys with titles, descriptions, dates, and locations
- Uses props and reusable card components to dynamically render entries
- Emphasizes component reusability and modular React development

GitHub: <https://github.com/DenisKiarie3/TRAVEL-JOURNAL>

Netlify: <https://deniskiarietraveljournal.netlify.app/>

• MEME-GENERATOR

A fun React project that lets users generate custom memes.

- Dynamically loads meme templates via API
- Users can add custom top and bottom text overlays
- Demonstrates form handling, image overlays, and useState management in React

GitHub: <https://github.com/DenisKiarie3/MEME-GENERATOR>

Netlify: <https://deniskiariememegenerator.netlify.app/>

INTERESTS & EXTRACURRICULAR ACTIVITIES

- ✓ **Open Source Contributions:** Actively explore and contribute to GitHub projects to sharpen real-world coding skills and collaborate with other developers.
- ✓ **Tech Meetups & Developer Communities:** Attend local tech events and participate in online communities such as Stack Overflow and Dev.to to stay updated with industry trends and best practices.
- ✓ **UI/UX Design Exploration:** Passionate about experimenting with user interface designs and improving user experience through clean, intuitive layouts.
- ✓ **Tutoring & Mentorship:** Volunteer tutor for younger students in science and technology, helping others build a strong foundation in programming and problem-solving.
- ✓ **Football & Fitness:** Enjoy playing and watching football as a way to unwind and stay active — also a great team sport that reinforces communication and strategy.
- ✓ **Creative Projects:** Build fun side projects such as meme generators, travel journals, and recipe apps to explore new tools and keep coding enjoyable.
