SUMMARY

Full Stack Developer with hands-on experience building modern web applications using React, Node.js, Express, and MongoDB. Skilled in designing responsive user interfaces, developing RESTful APIs, and managing full-stack projects from concept to deployment. Currently expanding expertise in Python, Artificial Intelligence, and Machine Learning through practical projects and Coursera courses. Passionate about creating efficient, user-focused solutions and continuously growing technical skills across both web development and AI-driven applications.

EXPERIENCE

01/2024

Freelance Full Stack Developer (MERN)

, Nairobi, Kenya

Technologies: React, Node.js, Express, MongoDB, Tailwind CSS, JWT

- Developed **JAYS CLOSET**, a full-stack e-commerce platform with product management and secure checkout
- Built RESTful APIs with JWT authentication and optimized MongoDB queries for performance
- Created responsive UI with React and Tailwind CSS, improving mobile load time by ~35%
- Managed Git/GitHub version control and deployed backend on Render, frontend on Netlify
- Translated stakeholder requirements into functional features, delivering projects on schedule

05/2024

Full Stack Developer – Personal Projects

, Remote

Technologies: React, JavaScript, APIs

- Built web apps including **Recipe App**, **Travel Journal**, and **Meme Generator**
- Implemented React Router for navigation and integrated APIs for dynamic content

- Used React hooks and reusable components for efficient state management and scalability
- Delivered functional projects on time while translating requirements from initial concepts

01/2026

Python Developer – AI & Machine Learning Projects

, Nairobi

Technologies: Python, Pandas, NumPy, Scikit-learn, Matplotlib, Jupyter Notebook

- Built and experimented with **machine learning models** to solve classification and prediction tasks
- Developed Python scripts for **data cleaning, analysis, and visualization**, improving understanding of data pipelines
- Implemented algorithms for text and numeric data, including word frequency analysis and basic predictive models
- Applied AI/ML concepts learned in **Coursera courses** to practical mini-projects, building a strong foundation in Python-driven data science
- Documented projects and code on GitHub, showcasing ability to learn and implement new technologies independently

EDUCATION

2022 - 2025

Software Development

KCA University, Nairobi

Bachelor of Science

Awarded Degree Certificate & Official Transcripts

SKILLS

Frontend: React.js, Tailwind CSS, React Router, JS

★★★★★

Python & AI/ML: Python, Pandas, NumPy, Scikit-learn

★★★★★

Office Tools: Word, Excel, PowerPoint, Google Workspace

★★★★★

Backend: Node.js, Express.js, MongoDB, RESTful APIs

★★★★★

Tools: Git, Github, VsCode, Postman, Render/Netlify

★★★★★

LANGUAGES

English

★★★★★

Kiswahili

★★★★★

HOBBIES AND INTERESTS

Coding & Open Source Contribution
Reading Tech Blogs & Tutorials
Tutoring & Mentorship

AI & Machine Learning Projects
Problem Solving / Puzzles
Sports & Fitness
